ABOUT US:

M/s. PANTHEON TECHNOLOGIES PVT LTD

established in the year 2007 as one of the distinguished establishment of executing technically advanced Water & Waste Water Treatment Projects. We are the pioneers in establishing automatic biological Waste Water Treatment Plant & Water Treatment Plant. Understanding the customers need and providing the right solution is the core of our excellence.

We executed various types of projects viz., Water Treatment Plant (WTP), Sewage Treatment Plant (STP) Reverse Osmosis System (RO), Ultra Filtration System(UF), Hydro Pneumatic System(HPS) to Gated Community, Residential Apartment, IT Companies, various types of Industries, Multispecialty Hospitals, Schools & Colleges, Private & Govt Office buildings, Function Halls, etc.,

Our team of engineers are well trained for starting form Project designing, execution & maintaining all above projects.

OUR SERVICES:

STP

Sewage Water Treatment Plant is one of the feasible and cost effective ways to treat waste water reusable for noncritical application. Our standard designed Biological Sewage Treatment Robust, automatic, smell free environment, & effectively removes the varied contaminants from the sewage water. The reclaimed water crystal clear & odour free fit for all noncritical application.

All our STP equipment's are manufactured by the premium equipment manufacturers that add to the efficiency & trouble free. Easy installation, easy maintenance and excellent performance are the salient features of our Sewage Treatment Plant that make it perfect for gardening and toilet flushing purposes. We have firmly positioned ourselves as one of the major Sewage Treatment Plant Suppliers, based in India.

- STP is the process of removing contaminates from waste water, both run off (effluents) and domestic.
- It includes physical, chemical and biological process.
- To remove physical, chemical and biological contaminates.
- Its objective is to produce a waste stream (or treated effluent) and a solid waste or sludge suitable for discharge or reuse back into the environment.
- This material is after inadvertently contaminated with many toxic organic and inorganic compounds.

Application: Used for gardening and toilet flushing.

WTP

When it comes to Water Treatment System, we are the most reputed Manufacturer, Supplier, and Exporter of Water Treatment System. We present different types of Water Treatment Systems, including Sand and Carbon Filter, Water Softener, Dual Media Filter etc. All these systems are the result of continual improvements; thus they serve the water treatment purpose with utmost efficiency. We design all these water treatment systems automatic at very economical and reasonable prices

RO

We provide high quality R. O. Plant that is widely used for drinking as well as industrial water treatment. We are well reckoned as one of the renowned Reverse Osmosis Plant Manufacturers and Exporters in India. Our RO Water Plant is developed from the optimum quality raw materials keeping in mind the national and international quality standards. Reverse osmosis plant removes microbiological impurities; dissolve salts, pesticides, chemicals and many other dissolved solids from the water and makes it suitable for several purposes.

- Reverse Osmosis (RO) is the finest water purification technology on the world.
- Water is purified by reversing the process of Osmosis. Membrane are used to completely remove dissolved solids contaminates Biological and chemical impurities unto 0.0001 (1 micron = 1/1000 mm) from water.

APPLICATION

- Provides Healthy & Homogeny Drinking Water, Industrial Process Water for High Purity Application and Boiler application

FEATURES & BENEFITS

- Purifies bore well & salty water
- Provides healthy & hygienic drinking water
- Gives special taste by removing all unwanted salts with added minerals.

TEAM

Backed by an enthusiastic team of professionals, we have achieved the steady success in the national market. Our dedicated team of experts always keeps itself a beast with the ever changing market requisites by attending various seminars and workshop. All their hard toils lead to provide excellent quality water treatment equipment's.

Sewage Water Treatment Plant (STP)

SBR - STP is one of the feasible and cost effective ways to treat waste water reusable for noncritical application. Our standard designed SBR Biological Sewage Treatment Robust, automatic, smell free environment, & effectively removes the varied contaminants from the sewage water. The reclaimed water crystal clear & odour free fit for all noncritical application. All our equipments are precisely selected for the desired application, that add to the efficiency & trouble free operation. We offer compressive AMC for all our designed & executed projects for the life time...

Easy installation, easy maintenance and excellent performance are the salient features of our Sewage Treatment Plant the reclaimed water perfect for gardening, flushing in toilets, etc,. We have firmly positioned ourselves as one of the major Sewage Treatment Plant Suppliers in India & Overseas.

WTP / RO/ UF/UV

The raw water from source treated to the required level of purity based on the required application, where the water quality plays a critical role.

The treatment either may be chemical or physical simple filters, softeners, DM or may be advanced systems like Ultra Filtration & Reverse Osmosis. Etc.

We can design & supply all kind of water treatment systems to your specific requirement.

Hydro Pneumatic System (HPS)

Pantheon Hydro Pneumatic System is designed to deliver water continuously at all outlets in all Floors of High Rise Apartments and Commercial Buildings with uniform pressure. The system is most ideal for High Rise Apartments and Buildings where the demand of water is variable and fitted without modern bathroom fittings like Jacuzzis, shower etc which require pressurized water for better functioning of the fittings

ABOUT US

PANTHEON TECHNOLOGIES PVT LTD

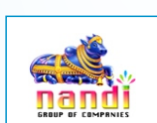

is a trusted organization & professionally managed company engaged in the field of Environmental Engineering, designing and manufacturing water purification & waste water recycling projects. We are pioneers in establishing automatic biological Waste Water Treatment Plant & Water Treatment Plant understanding the customers need and providing the right solution is the core of our excellence.

We executed various types of projects viz., Water Treatment Plant (WTP), Sewage Treatment Plant (STP) Reverse Osmosis System (RO), Ultra Filtration System(UF), Hydro Pneumatic System(HPS) to Gated Community, Residential Apartment, IT Companies, various types of Industries, Multispecialty Hospitals, Schools & Colleges, Private & Govt Office buildings, Function Halls, etc.,

Capitalizing our 16 years + experience we Design /Build /Modify/Modernize Water & Waste water treatment systems guaranteed for performance dependability and cost effectiveness. Our experienced Engineering team offer 100% appropriate solution to the specific problems. Our objective is known for perfect job expertise quick service superior quality which produces reliable & uniform results time after time year after year.
